App-level build.gradle (<project>/<app-module>/build.gradle):

```

apply plugin: 'com.android.application'
// Add this line
apply plugin: 'com.google.gms.google-services'
// Import the Firebase BoM
implementation platform('com.google.firebase:firebase-bom')
// Add the dependencies for the services you want to use
// https://firebase.google.com/docs/bom
}

```

By using the Firebase Android BoM, your app will always use compatible Firebase library versions. [Learn more](#)

Finally, press "Sync now" in the bar that appears in the IDE:

Gradle files have changed sir [Sync now](#)
